## Eco Grease

### GROUND-BREAKING GREASE

**Eco Grease** is a lubricant that is suitable for all machines with a central lubrication system including construction machines, heavy equipment, forestry vehicles, etc. The product is non-toxic and 100% biodegradable. Furthermore, Eco Grease is nonflammable and can be used as an environmental friendly option to traditional oil-based lubricants. The grease has shown excellent lubricant properties, even under very cold weather conditions. Our water-soluble product will keep your machines clean and maintain a high performance all year around!

### CUSTOMER BENEFITS

- Water-soluble formula will keep your machines cleaner
- Fire and anti-corrosion properties
- High performance even under cold conditions
- Excellent lubricant properties prevent abnormal wear
- Non-toxic

### PRODUCT BENEFITS

- Environmental impact is significantly reduced since the grease is 100% biodegradable

### INSTRUCTIONS

- Make sure to consume existing grease as much as possible before filling the tank with Eco Grease.
